Hi Lorraine

Yes I do have some Malachite green in stock but non of it has been used in at least 10 years. I have approximately:
Woss Community Hatchery: 24 litres of diluted mixture and I litre of pure mixture (now being stored at our DFO office)
Nimpkish hatchery: Approximately 15 litres (diluted)

Cheers,
Aleria Ladwig

May I have your responses (YES or NO) as soon as possible please. Deadline was May 31st. Whether this is a hatchery, CEDP or other facility.

Do you malachite green in stock? If so, how much?

Subject: Malachite Green
Importance: High

We require proof that our DFO (SEP & biodiversity) hatcheries are NOT using Malachite Green (MG).

CFIA is being informed by industry that it is being used in 100% of our DFO hatchery's. We have a conference call with BCMAFF this afternoon and urgently need concrete confirmation that this is not the case.

Please see the attached draft list of approved chemicals and veterinary application recommendations and use. This can be distributed to all DFO hatcheries for their information and reference. This is a back-up to information provided by the province to private hatcheries and is intended for our web-site.

<< File: Approved Hatchery Chemicals Notice (draft).doc >>

If there is any evidence of MG use, please let us know. This is URGENT. We will need to follow up with senior management and CFIA.

Thanks

Sharon
